

Wajiha Waqar

Address: Chakwal District, Punjab, Pakistan | **Phone:** +923120885201 | **Email:** wajiha0waqar@gmail.com

[LinkedIn](#) | [GitHub](#)

Profile Summary:

Data Scientist with strong skills in Python, SQL, C++, and data visualization tools including Tableau, Power BI, and Excel. Experienced in exploratory data analysis, machine learning, NLP-based text processing, and data-driven decision-making through academic projects and internship experience in student profiling and analytics. Passionate about AI-driven systems, data analytics, and building intelligent, real-world solutions.

Education:

BS in Information Technology | University of Chakwal, Punjab, Pakistan | CGPA: 3.37/4.0

Certifications:

- eHunar Data Science & AI/ML Engineer
- Google AI Essentials
- Google Prompting Essentials
- Google IT Support Professional Certificate
- Google Project Management Professional Certificate

Skills:

Programming: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), SQL, C++.

Tools: Power BI, Tableau, Excel, Streamlit, Jupyter Notebook, Git/GitHub, Docker.

Databases: Oracle, MySQL.

Core Competencies: Data Cleaning, EDA, Data Visualization, Machine Learning Basics, NLP, Problem solving, Statistical Analysis, Curiosity, Collaboration, Critical thinking, Data Storytelling, Troubleshooting, Communication, Empathy, Leadership.

Experience:

Admission Officer Intern (Student Counselling)

Edex Group of Chakwal | April 2026

- Conducted student profiling and needs analysis to recommend suitable academic programs and international study destinations (UK, Europe, Australia)
- Researched global education opportunities and supported admission processes through accurate documentation handling and requirement evaluation
- Provided structured guidance to students, applying analytical thinking, problem-solving, and clear communication to support informed decision-making

Professional Projects:

AI-Based Resume–Job Matcher (ATS Score Analyzer) | [GitHub](#) | [Live Demo](#)

- Built an AI-powered web application using NLP and machine learning to evaluate resume–job compatibility
- Implemented TF-IDF vectorization, text preprocessing, and Ridge Regression to generate ATS-style match scores
- Deployed an interactive Streamlit app supporting PDF, DOCX, and TXT resume uploads

Workplace Equality Data Analysis | [GitHub](#)

- Analyzed workplace equality data using Excel (37 records, 4 features) to assess fairness across job roles
- Designed rule-based classification to label roles as Fair, Unfair, or Highly Discriminative
- Applied Excel formulas and conditional logic to derive insights

Data Analysis for Malfunctioned Device Types | [GitHub](#)

- Developed an interactive Tableau dashboard to analyze malfunction rates across factories and device types
- Identified high-risk device categories using calculated fields, filters, and comparative visualizations
- Presented actionable insights highlighting critical contributors to failures

Iris Dataset Exploratory Data Analysis | [GitHub](#)

- Performed exploratory data analysis using Python (Pandas, Matplotlib, Seaborn) to study species patterns
- Created statistical visualizations including histograms, boxplots, and scatter plots
- Documented findings in a reproducible Jupyter Notebook published on GitHub

Extracurricular Activities:

Deloitte Australia Data Analytics Job Simulation (Forage, Sep 2025) – Completed data analysis, built Tableau dashboard, and classified data using Excel.

University of Chakwal Departmental Cricket Team Member (2023-Present) – Represented in competitions, developed teamwork and strategic thinking.
